Electromagnetic waves Another good combination is ultrasound used along with electromagnetic waves. When mice smell the aroma from the pouches, they immediately leave the area. Not all home pest repellents work the same way. We had a roof rat invade our home and I was looking for a chemical free solution, and after installing the rodent free devices, one near our rear sliding door and the other in an outside shed where there was activity, we did not experience any rat activity for two weeks. In such a case the best course of action is to contact the professionals for assistance. NzqxjxzEffectivenessUltrasonicPestRepellers.Itwillworkautomaticalhavnt heard any noises in the roof as yet but tired of taking it out to use the other side of the powerpoint.
