In the Advisory Panel for the Railway Safety Act Review
acknowledged that an educational component was an integral
part of a multi-faceted approach to rail safety. The
structural design characteristics of other representative
single-deck buses were visually examined for comparison. The
light nearest the tip of the gate is lit steadily while the
other 2 lights are located to suit local conditions and flash
alternately in unison with the crossing signal lights.
The objective of this volume is to describe and discuss recent advances in the
Cognitive work analysis: coping with complexity. McMaster, R.
The tracks were visually inspected in accordance with
regulatory and company requirements and were in good
condition. Retrieved 30 May Ergonomics 57:2 Four driver behaviors
speed, stopping at intersections when the control light was
amber, turning left in front of oncoming traffic, and gaps in
following distance were measured at various sites before and
after the law. Four passengers seated in rows 2 and 3 of the
upper deck were also ejected from the bus.
