An enlarged prostate gland can cause uncomfortable urinary symptoms, such as blocking the flow of urine out of the bladder. A prostate gland also occurs in some invertebrate species, such as gastropods. The prostate gland is located beneath your bladder.

It continues to enlarge with age to an average weight of 40 grams in men in their 50s. The prostate is a small gland in men that helps make semen. A couple isn't suspected of fertility problems until they have tried and failed to conceive for one year. Some studies have shown that it may help with symptoms, but results are mixed, so talk to your doctor if you have any of these problems. Contraception - injections for men Contraceptive injections for men are not yet available in Australia, but clinical studies suggest that they may provide a safe, effective and reversible method of male contraception in the future.
