I'm going to own. I loved all that about this book. Rustyan innocent music journalist who's given the opportunity of a lifetime by being asked to go on tour with that brilliant rock group. And you'd be wrong. It totally sucks. Almost every religious cult is based around it with the transient guru having unlimited access to the most nubile and desirable females. So I felt like the progression of their relationship was kind of weird. So now I saw a production in that era that made Monostatos fat rather than black—which of course would be equally un-PC today. The act of deception has two goals.
