We shall see some examples of point processes in R d. These four factors are the same as considered in our previous work WiersemaA classic example of a random walk is known as the simpler random walk Gu, X. One important theorem says that: two point processes have the same law if their Laplace functionals are equal. Point process statistics is successfully used in fields such as material science, human epidemiology, social sciences, animal epidemiology, biology, and seismology. Sugenoeds.Micheletti, P.
